Galax cycling bibs offer the highest-quality at a competitive price.

Ride in the same shorts you see on national champions Ryan Trebon and Tim Johnson.

Our chamois is a revolutionary 100% seamless, multi-density, Italian 4-Way Pad. What truly sets our new pad apart is that it's a stretch pad. That's right — an elastic chamois. Why is this important? As you ride and your legs go round and round, you need a pad that moves and conforms. Traditional pads stay in one place. Ours doesn't. The first time you ride in our bibs you will immediately feel the difference!

Also, our 4-Way Pad — is BIOAKTIV. Unlike other pads that are labeled as 'antibacterial' our pad uses no chemical substance on the fabric, and no chemical substance near your skin. BIOAKTIV avoids formation of bacteria thanks to the silver ions in the yarn. Unlike a chemical substance on the fabric, this is permanent; it does not disappear after washing!

We do not offer a "Pro" and "Club" pad. Our philosophy is that EVERY cyclist deserves the best so your team will use the same pad as the pro teams we sponsor.

Need more clothing choices?

We also offer long-sleeve and sleeve-less jerseys, vests, four different jackets, skinsuits as well as running and triathlon clothing.

Our Wind Jackets and Wind Vests are made from our exclusive WindGuard fabric. WindGuard is a lightweight shell fabric that is both wind and water resistant. Perfect for cool weather conditions, garments made with WindGuard can be easily removed and stored in a jersey pocket.

So what do you wear in the spring and fall when temperatures are in the 40s and 50s? The Tech Fleece jacket is the answer! We've made a lightweight jacket that is perfect for spring and fall riding. Made from the same Tech Fleece fabric used in our arm, leg and knee warmers, this lightweight jacket is ideal when a long sleeve jersey is not enough and a ThermoShield Winter Jacket is too much.

Forget layers and layers of rough, bulky and ill-fitting clothing. ThermoShield fabric is designed to keep you warm even when temperatures drop below freezing. Our exclusive ThermoShield fabric is a windproof, three-layer fleece. With normal fabrics, wind cuts through the material, making you feel cold. ThermoShield stops the wind and the chill that comes with it.
